Education

Computer systems engineer

August 2022 - Currently

TECNM (ITZ) - Instituto Tecnológico de Zacatepec

Development of skills in AI & Data

August 2023 - February 2024

Recipient of a government scholarship for a course led by industry professionals.

Experience

Fullstack developer

June 2023 - Currently

Tools - [your-tools.vercel.app](#)

I developed a programming and technology blog that offers valuable tools, resources, and information to help people in entering the programming world. I showcased my proficiency in web development with the technologies used.

Founder & Frontend developer

May 2021 - July 2021

ORDEEM - [ordeem.vercel.app](#)

I founded a local delivery app that caters to the shopping needs of seniors, providing me with insights into the workings of a small business. Simultaneously, I acquired a foundational understanding of web programming.

Awards

Finalist Contestant (Frontend developer)

September 19, 2023

InnovaTecNM (Hackathon) - [itoinnovatecnm.com](#)

I excelled as a frontend developer in a hackathon, making a significant contribution to my team's success. We progressed from the regional round to the national round, showcasing my technical skills, but also my ability to tackle challenges.

Contestant

September 8, 2023

ICPC regional Mexico - [regional2023.icpcmexico.org](#)

I participated and advanced from the regional to the national phase of the ICPC, working collaboratively with two teammates. We made history as the first team from my university to reach this advanced stage, showcasing my skills in algorithmic problem-solving.

Contestant (Leader)

September 2022

Hackatec ITZ (Hackathon) - [zacatepec.tecnm.mx](#)

I won the third place in a hackathon where I developed an Artificial Intelligence with multiple linear regression, where I mainly learned to lead and work as a team. I secured an internship with the BeeckerCo company

Contestant

November 28, 2020

OMRI - [omri.org.mx](#)

I participated and won a bronze medal in a statewide programming competition in the C++ language, where I solved programming logic problems on the OmegaUp platform. It was my first experience of competition and learning in programming during my academic journey.
