github.com/isaijesus

### Portfolio
isaijesus.netlify.app

### Languages
- Spanish (Native)
- English (A2)

### Skills
- Web development
- Teamwork
- Logic problem solving
- Understanding
- Respectful

### Hobbies
- Learn new technologies
- Sports

## Experience

### Fullstack developer — April 2022 - Currently
Tutorial App - tutorial-app-isai.netlify.app

- I developed a tutorial application in order to help users to do things they don't know how to do.
- I designed the frontend with React JS, Next JS and Tailwind CSS and I created the backend with Mongo DB.

### Fontend developer — May 2021 - October 2021
ORDEEM - ordeem.com

- I created a delivery app, a local delivery venture to facilitate shopping for mainly older people.
- I used React JS and its hooks for the development of the app.

### Competitor — June 2021 - September 2021
OMRI - omri.com.mx

- I participated in a statewide programming olympiad on solving logical programming problems in the C++ language.

### Designer and developer — March 2021
CBTA 39 - cbta39.com.mx

- I designed and created the website of my current school with HTML, CSS and Bootstrap.
- I created a form for the registration of admission, as well as its database with PHP and a library that creates PDF.

## Education

### Técnico en programación — 2019 - Currently
Centro de Bachillerato Tecnológico Agropecuario No. 39
